KEY FEATURES
SAVING BACKS OF YOUR TEAM

✂ FLEXIBILITY

Backsaver manufactures stainless-steel lifting and tipping equipment for the food industry. First, we select a standard machine type and reconfigure it to meet your requirements. Whether your product is meat, fish, dairy or fruit, the Backsaver will suit it perfectly.

🏠 LIFT YOUR BUSINESS

Regardless of what kind of container is used for your products (big boxes, combo bins, crates, buggies, tubs, barrels, etc.), we can deliver a Backsaver solution to enhance production and ensure success.

🔩 STAINLESS STEEL

Backsavers are constructed from the AISI304 and AISI316 grades of stainless steel for an optimal quality/price ratio with maximum hygiene and food safety. Moreover, they're approximately 90% recyclable.

💡 EASY TO USE

Backsavers are simple and user-friendly. They're easy to maneuver, and you can operate one from either side. Moreover, each unit has a powerful, deep-cycle battery that eliminates the need for a power cord. So, you can use the Backsaver throughout your facility.

💧 HYGIENE

Hygiene is a key concept in the machinery design engineering and manufacture for the food industry. All our machines consist of components and assemblies designed to ensure consistent product hygiene and employee safety. Backsaver machines are IP56-rated and allow cleanup with a regular pressure washer.

🇳🇱 MADE IN HOLLAND

Backsaver stainless-steel lifting and tipping machines are designed and manufactured with more than 30 years of experience in the Netherlands at our in-house design engineering and production facility. Thanks to comprehensive customization, we can meet the requirements of any production facility.

EASY TO CLEAN

WE LIFT YOUR BUSINESS OUR BACK SAVING MACHINES

BACKSAVER ST STANDARD TIPPER

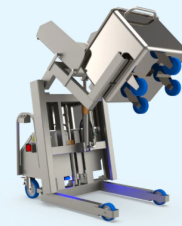

The Backsaver ST Standard tipping machine is designed to empty large plastic bins, tubs or crates at a work table height. It can also be customized to handle dough mixing bowls, standard bins, barrels and other containers.

BACKSAVER BRL BARREL TIPPER

BACKSAVER NTLT BUGGY LIFTER/TIPPER

The Backsaver NTLT lifting/tipping machine is designed to empty standard DIN/STP 200- or 300-liter meat carts, eurobins, trolleys or buggies when the Backsaver NT tipper's dumping height is insufficient.
